

Guardian of Decentralization Exchange

GUARD OF DECENT (GODEX)

GODEX Disclaimer

Important: This disclaimer is provided for informational purposes only and should not be considered investment advice. Please conduct your own thorough research and consult with a qualified financial professional before making any investment decisions.

No Current Value or Profit Potential:

- The GODEX token currently holds no intrinsic value.
- It is not intended to be an investment, and there is no expectation of future profit.

Tax Implications:

- You are solely responsible for understanding the potential tax consequences of acquiring, holding, or trading GODEX tokens.
- Consulting with a tax advisor is highly recommended to navigate these complexities.

Project Focus and Aspirations:

- The primary objective of the Guardian of Decentralization Exchange project is not financial gain.
- Its core mission is to establish a decentralized religion, free from traditional structures like rules, rituals, or centralized leadership.

Valuation Goal: Not a Guarantee:

- The project has communicated a goal of pegging the value of 1 GODEX token to 1 gram of 24-carat gold.
- However, this is an aspiration, not a guaranteed outcome. The development team is committed to working towards achieving all stated objectives.

Project Location and Regulatory Considerations:

- While the developers are primarily based in Switzerland, the project itself does not have a physical presence within Switzerland.
- This means it is not subject to Swiss laws or regulations.

Domain Ownership and Disclaimer of Liability:

- The owner of the domain hosting project information cannot be held liable for the actions or pronouncements of the GODEX project. The same applies to the Twitter accounts, GitHub accounts, or any other digital resources or communication channels, as they are decentralized. The holder of these accounts is not the owner of the tokens; they act merely as the current representative, which can be an individual or a group.
- They bear no responsibility for any losses or damages incurred through investment or use of the GODEX token. • The owner of the domain, as well as the holders of the associated digital accounts and communication channels, disclaim all warranties and representations regarding the GODEX project. This includes, but is not limited to, any implied warranties of merchantability, fitness for a particular purpose, or non-infringement.
- Any content or information provided through the domain or associated accounts is for informational purposes only and does not constitute financial, legal, or professional advice. Users are advised to conduct their own research and consult with professional advisors before making any decisions related to the GODEX token or project.
- The owner of the domain and the holders of the associated accounts cannot be held liable for any indirect, incidental, consequential, or punitive damages arising out of or related to the use of the GODEX token or reliance on any information provided.

Founder Anonymity and Potential Risks:

- The project's founder, known only by the alias "Genesis," operates anonymously.
- This lack of transparency makes it difficult to assess the founder's credentials and intentions, potentially increasing investment risk.

Investment Due Diligence:

- Before making any investment decisions regarding GODEX tokens, carefully review the project's whitepaper and all available documentation.
- Responsible investing practices require thorough research and understanding of the project.

Investment Limits and Professional Guidance:

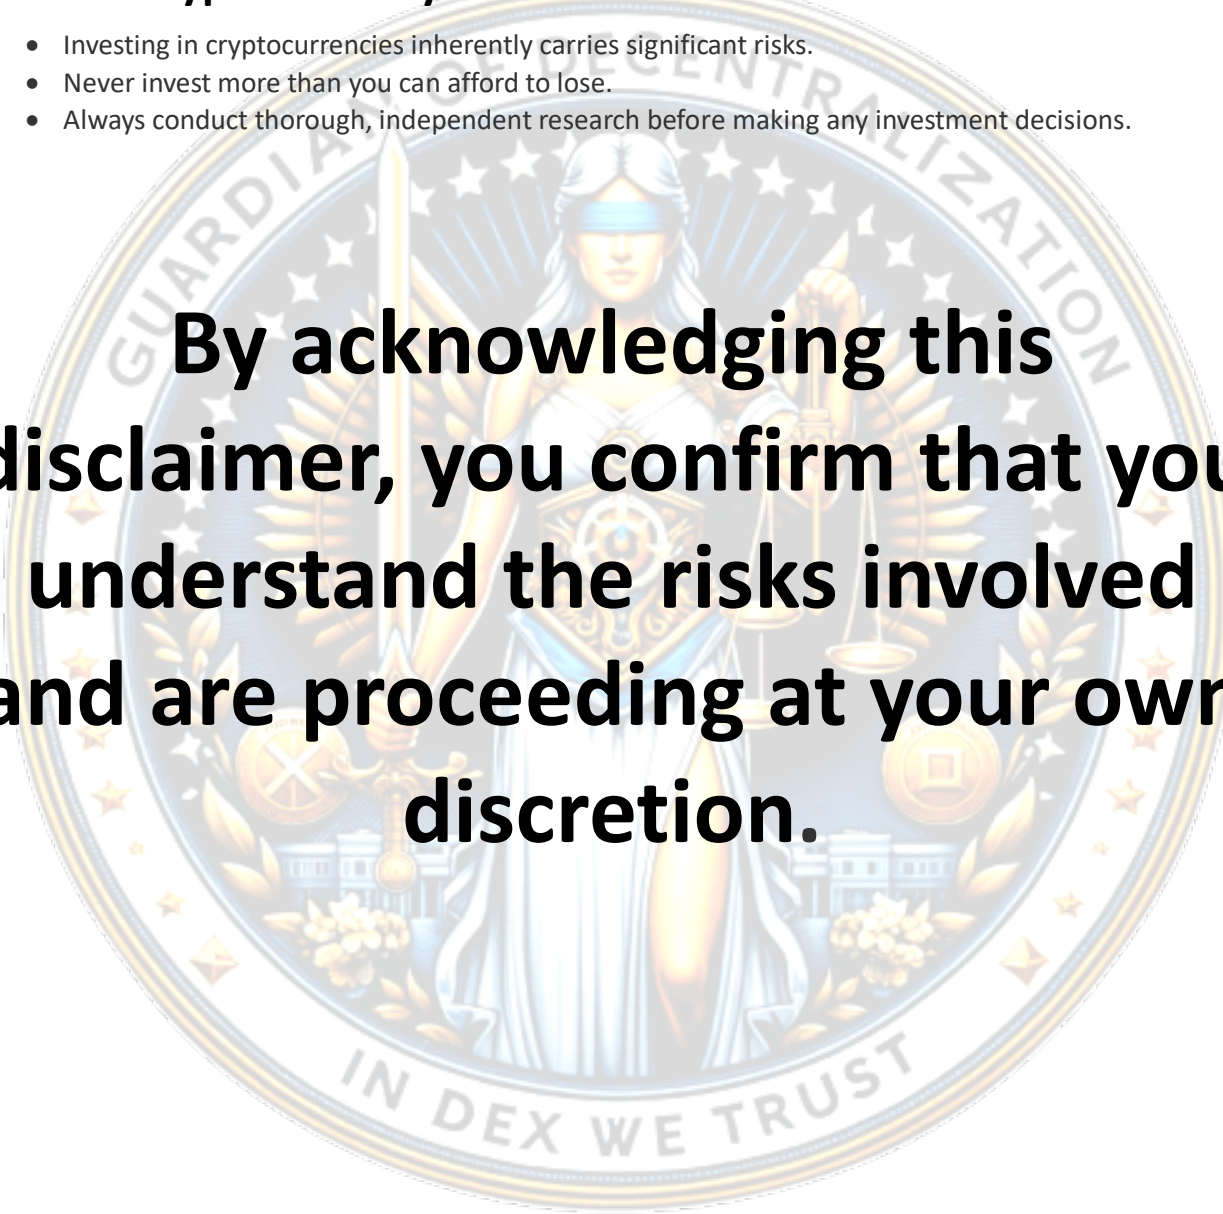

- Only invest what you can comfortably afford to lose. Cryptocurrencies are inherently risky investments.
- If you have any questions or concerns about the tax implications of GODEX tokens, seek professional financial advice.

Additional Risk Factors:

- The founder's anonymity adds an extra layer of risk.
- The concept of a decentralized religion without established structures is novel and unproven. Its success is uncertain.
- Regulatory scrutiny is a potential consequence of the project's claims about tax benefits and religious status. This could lead to legal challenges or operational changes.

General Cryptocurrency Investment Risks:

- Investing in cryptocurrencies inherently carries significant risks.
- Never invest more than you can afford to lose.
- Always conduct thorough, independent research before making any investment decisions.

By acknowledging this disclaimer, you confirm that you understand the risks involved and are proceeding at your own discretion.
